

Cut flower seed and young plant suppliers directory

Compiled by Gordon Hanks, Independent Consultant

A database of seed and young plant suppliers and related companies in the cut flower industry

Please note: The emphasis of this database has been to list businesses that might be of use in sourcing information, seeds, young plants, cuttings, liners, etc., for the production of cut flowers, fillers and foliage. Some of these companies supply a wide range of materials, while others specialise in a limited range, only some of which may be relevant to the cut flower sector. Cut flowers always grown under heated glass (such as roses) and bulbous plants have not been specifically searched for, though some may have been incidentally included. The compiler does not claim this database is comprehensive, and would be glad to receive any constructive additions, alterations or corrections for inclusion at a later date via wayne.brough@hdc.ahdb.org.uk.

The inclusion of an organisation does not imply an endorsement, nor does the omission of an organisation imply any criticism. The information is given in good faith and is understood to be accurate as of July 2014. Comments given in the database represent the compiler's personal opinions, and may not represent the views of the CFC/CFA/HDC.

Aris Horticulture (formerly **Yoder Brothers Inc**) is an American flower research, breeding and production company. Products include perennials, florist's azalea, tropical hibiscus, hydrangea, gloxinia, lisianthus, mandevilla, pot 'mums, garden 'mums and asters.

Aris Horticulture operates three business units: **Green Leaf Plants** provides starter plants and pre-finished products for perennials, azalea, tropical hibiscus, hydrangea, mandevilla, poinsettias, rose, exacum, gloxinia, lisianthus and pentas. Some of this material is available for Europe: see the main entry for **Green Leaf Plants**.

Keepsake Plants produces finished potted plants sold across North America, specialising in florist's azalea, chrysanthemum, fleurettes, tropical hibiscus, mandevilla, hydrangea, poinsettia, Easter lily, Persian violets and others. See: www.keepsakeplants.com

Aris Horticultural Services is the technical and sales arm.

In 1995 **Blooms of Bressingham** was set up as a new company in North America to introduce exclusive perennials from England. This has since expanded into a global activity with business partners in many countries. See their main entry.

Armada

Noord Lierweg 18 B

2678 LV De Lier

The Netherlands

Combinations

Bagijneland 1

2691 NC 's-Gravenzande

The Netherlands

T +31 (0)651 555 293 (Jan Noordam)

E j.noordam@combinations.eu

W www.combinations.eu

TM Noordam's nursery was established in 1931 and delivered vegetable young plants to growers. Later the company was called **Combiplant**. In 1993 **Combifleur** was founded and engaged in the sales of seeds and young plants of ornamental crops and, later, of cuttings of bedding plants. In 1996 **Combifleur** started breeding cut flowers since most varieties used at the time had been bred under different climatic conditions and were not best adapted to Northern Europe. In 2008 the companies merged as **Combinations**.

In 2013 the company split to form **Noordam Plants**, which specialises in the production of young plants. From 2013 **van Egmond** and **Combinations** worked to provide lisianthus growers with the best young plants, the whole process now being directed by **van Egmond**, with **Combinations** focussing on products that fit within the strategy. In 2014 **Combinations** established a relationship with **Florensis** in which the latter took over its sales activities of pot and bedding plants from seed. **Combinations** continues to produce young plants of vegetables and ornamentals, including of its specialties (e.g. helianthus, viola, lavender and cyclamen) for **Florensis**.

The Netherlands

T +31 (0)297 325 462

F +31 (0)297 344 642

E info@vanzelderen.nl

W www.vanzelderen.com

GJ van Zelderen is a producer and distributor of planting material to professional growers internationally, with a wide variety of cut flower and pot plant young plants, including asparagus, aralia, *Radermachera sincica*, *Schefflera arboricola*, *Nolina recurvata* and others. Their range of green fillers has given them a foothold in the bouquet market.

Their research led to the company unveiling its first curcuma and globba varieties, which have proved successful in cut flower production as well as for pot plants. Also specialises in indoor and outdoor palms, and indoor green plants for pot plant and cut leaves.
